

Software Engineer

We are currently seeking a **Software Engineer** to join our **Orlando, FL** office. This person must be a self-starter who can work well within a team, is able to handle the pressure that comes with working on projects with very short lead times and be able to change directions quickly when required to do so.

Responsibilities and Qualifications

- Analyze software requirements to determine feasibility of design within time and cost constraints
- Participate in the designing, coding, testing, debugging, configuring, and documenting of software products.
- Consult with hardware engineers and other engineering staff to evaluate interface between hardware and software, and operational and performance requirements of overall system.
- Design and implement interfaces and middleware software for the integration of Company products into the airport/aviation industry and operating environments.
- Develop and direct software system testing procedures, programming and documentation.
- Apply generally accepted programming standards and techniques to assure efficient program logic and data manipulation.
- Consult with customers concerning maintenance of software system.
- Diagnose and resolve software problems.
- Coordinate installation of software system.
- Other duties as required.
- **Required skills** – 2 to 3 years Java experience, RDBMS experience such as Oracle or SQL Server, user interface development
- Preferred skills – EJB 3.0, Java Swing, JBoss, Web Services
- **Education and/or experience required** – Bachelor's degree from four-year college or university; or one to two years related experience and/or training; or equivalent combination of education and experience.
- **Salary range:** \$40,000 to \$50,000 depending upon education and level of experience.
- **Benefits:** Excellent benefits package including insurance program, tuition reimbursement, employer 401(k) match, and much more.
