

Life Just Got a Whole Lot Easier

AirIT & DST, Now the One Company Airport Executives Can Rely on for all Your Operational and Revenue Management Needs

Getting the latest and best information to everyone who needs it is the key to keeping an Airport running smoothly. By integrating your operations and revenue management systems, that's just what you'll achieve. AIR IT & DST, developers of PROPworks® have recently joined forces and can now make your job easier by providing you a single resource for integrated technology solutions that allow you to maximize operational and financial efficiencies while ensuring customer satisfaction.

AIR IT & DST Develops and Integrates a Broad Range of Software Applications & Systems

Our Total Airport Management System gives you the flexibility to integrate all of your applications and systems including: Airport Operations Database

(AODB), Flight Information Display Systems (FIDS), Gate Management Systems (GMS), Baggage Reconciliation Systems (BRS), Common Resource Emulated Work Stations (airline host-integrated workstations) (CREWS), and the industry leading revenue management system PROPworks®. In addition to its product applications and offerings, AirIT & DST also provide consulting services, networking and installation, with 24 X 7 system support.

To find out more about how we can help you make operations integration work for you now and in the future, stop by our **Booth # 733 at ACI Exhibition, Nov. 11-14, 2002** or call **(630) 548-4917**.

AirIT and DST Provides Customers a Single Source for Air-Transport Operations and Revenue Management Systems

“The combination of AirIT and DST provides the air transport industry a single resource for integrated technology solutions that allow airports to maximize operational and financial efficiencies while ensuring customer satisfaction.”

Air-Transport IT Services, Inc. (AirIT) is a single source provider and integrator of diversified information technology products and services to the air transportation industry, offering a full complement of operations and revenue management systems. From the ramp to revenue management, AirIT is the one company that airports and airlines can rely on for comprehensive integrated technology solutions. AirIT products enable airports and airlines to reduce costs, optimize cash flow, and streamline operations.

The company provides and integrates a broad range of software including Flight Information Display Systems (FIDS), Gate Management Systems (GMS), Baggage Reconciliation Systems (BRS), Common Resource Emulated Workstation System

(CREWS), security systems, and others. And combined with Decision Support Technologies, Inc., (DST), it now offers its PROPworks(r) revenue management product.

The benefits gained through integration and shared resources are considerable for airports, airlines and its passengers. The airport and airlines benefit through the efficient utilization of resources such as gates, baggage and check-in positions. It also eliminates the unnecessary duplication of data and its manual input. Most importantly, these efficiencies result in lower cost, streamlined passenger processing, and more timely and accurate communication to the traveling public.

AirIT is uniquely positioned to serve and take leadership in the evolution from disparate, stand-alone applications to more highly sophisticated and integrated solutions. It has a proven track record of providing these applications and solutions for airports and airlines for more than 20 years.

Furthermore, AirIT is develop-

ing and purchasing its own applications. The recent acquisition of DST enables AirIT to offer a powerful revenue management application. The combined companies also have future plans to develop a number of additional applications to serve the air transportation industry.

Air-Transport IT Services, Inc. is based in Naperville, IL, with offices in Orlando, Florida and the Washington DC area. The company's Total Airport Management System is the most comprehensive offering available to the air transportation industry. AirIT solutions are based on open systems and run in a client/server environment. In addition to its product offerings, AirIT also provides consulting services, networking and installation, and 24 X 7 system support. AirIT International GmbH, Frankfurt, Germany is a subsidiary of Fraport AG and a sister company to Air-Transport IT Services, Inc.
