

FOR IMMEDIATE RELEASE

AIR-TRANSPORT IT SERVICES, INC. LAUNCHES THE FUTURE OF OFFSITE PASSENGER PROCESSING AND BAGGAGE CHECK-IN

October 23, 2007, Orlando, FL - Air-Transport IT Services, Inc. (AirIT), a key provider of diversified information technology products and services to the air transportation industry, today at The Boyd Group Aviation Forecast Conference in Sarasota, FL. demonstrated a new end-to-end off-site passenger processing solution to seamlessly check-in passengers and baggage before they arrive at the airport. CheckPort™ by AirIT, delivers airline boarding passes and baggage tags utilizing web services technology. Relying solely on internet accessibility, this new software solution provides a contemporary, cost-effective methodology to bring the total passenger check-in experience anywhere. Due to its straightforward architecture and design, CheckPort™ by AirIT requires only minimal airline effort for implementation. This technology was developed in concert with Southwest Airlines and is currently being used to deliver unequalled convenience to their passengers when they arrive at Port Everglades Cruise Terminal in Fort Lauderdale, FL. This solution allows Southwest's passengers to take advantage of the baggage concierge service offered at the port by Bags To Go, Inc. Bags To Go utilizes the CheckPort™ system to issue boarding passes to Southwest passengers and also to tag luggage directly at the port. This remote check-in process relieves Southwest passengers from the necessity to visit the ticket counter upon arrival at the airport and frees them from their baggage until they arrive at their destination airport.

“The primary goal of CheckPort™ is to deliver the vehicle by which Southwest and Bags To Go can provide unparalleled service and convenience to the passenger” said Mr. Betros Wakim, President and CEO of AirIT. Mr. Michael Boyd, principal of The Boyd Group added, “The ability to move the passenger check-in process beyond the confines of the airport, represents the future of the aviation industry, technology like CheckPort™ make this a reality”.

AirIT is currently working with several other carriers to provide a similar solution to their passengers.
