

FOR IMMEDIATE RELEASE

AIR-TRANSPORT IT SERVICES, INC. ANNOUNCES THAT ANCHORAGE AND FAIRBANKS INTERNATIONAL AIRPORTS HAVE CHOSEN THE AIRIT EASE™ VIRTUALIZED MULT-SIDED INFRASTRUCTURE TO REPLACE THEIR EXISTING SITA™ CUPPS SYSTEMS

January 9, 2012, Orlando, FL – Air-Transport IT Services, Inc. (AirIT), a key provider of diversified information technology products and services to the air transportation industry, announced the execution of a contract to provide the EASE™ common use solution to two key airports in Alaska.

AirIT's common use system, EASE™ (Extended Airline System Environment), is a cornerstone of the platform that ultimately allows any equipped ticket counter or gate podium to be utilized by any airline using their own proprietary passenger processing software without modification. The two implementations in Alaska will include full common use and LDCS (Local Departure Control System) functionality to accommodate airlines including, Air North, Alaska, American, Condor, Delta, Frontier, JAL, JetBlue, Sun Country, United and US Airways. Importantly, this project will replace two existing IATA CUPPS / CUTE systems that were installed by SITA™ to accommodate last years' seasonal operations at both airports.

Betros Wakim, AirIT CEO states, "The selection of the virtualization platform by AirIT is easily understood when one looks at the arduous requirements borne by the carriers when they have to operate in an IATA CUPPS/CUTE environment. We are proud to be able to transition Anchorage and Fairbanks onto our virtualization platform easily and cost effectively. In addition to airports and airlines strong support of virtualization, we are seeing a change directly from multiple industry organizations, as they are transitioning their own technology focus toward emerging technologies. These changes will benefit the total air transport community and allow consistent evolution of more contemporary technologies such as virtualization."

About Air-Transport IT Services, Inc.

Air-Transport IT Services, Inc., with corporate offices in Orlando, Florida, offers airlines and airport IT systems that enable them to deliver, display, manage and employ information that improves operations, customer satisfaction and revenue generation. The company's airport operational, passenger processing and revenue management solutions are the most comprehensive offerings available to the global air transportation industry. In addition to its product offerings, AirIT also provides consulting services, networking and installation and 24 x 7 support. AirIT is proud to be one of the top 100 best companies to work for in Florida, according to Florida Trend Magazine's annual issue of "Florida's Best Companies to Work For."
